PC-40 CHARCOAL GREY

PC-21 SEMI GLOSS BLACK AT VIVA RAILINGS HEADQUARTERS

### Looking for a pop of color for your MetalSpace?

Powder coating is an environmentally-friendly option because it doesn't rely on solvents or chemical carriers. Instead, an electrostatic charge holds the paint to the steel, thus eliminating VOC emissions which will help in regards to LEED requirements. In addition, it meets AAMA specifications.

Powder coating is durable and scratch resistant so it weathers and retains its original hue better than conventional liquid coatings.

Powder coating can be applied to most of our systems.

Shown here are the standard colors available. As in all of our railing systems, customization is always available as at MetalSpaces our priority is ensuring that what we construct perfectly matches your vision.
